51 Years of Excellence & Proud

51 YEARS

The Hand Tool Expert

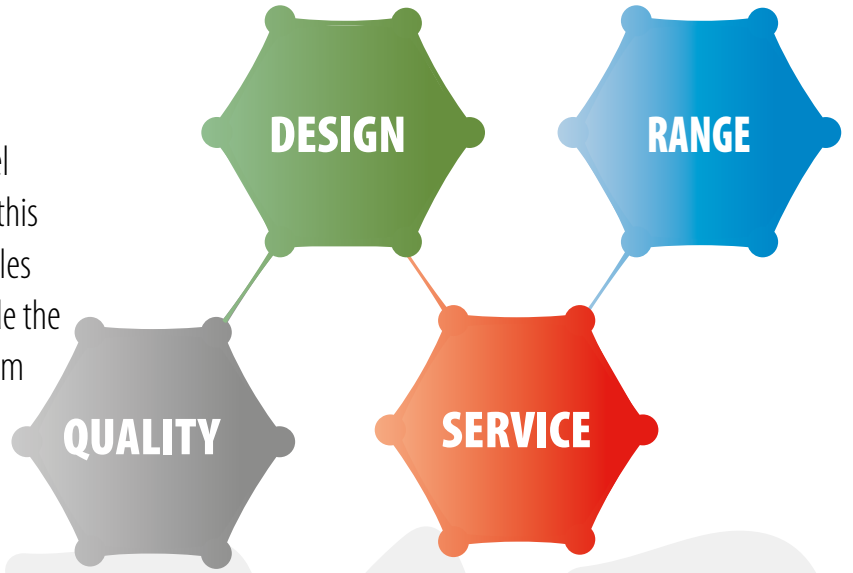

Our story which started back in 1975 with a big vision in a small workshop is 51 years old. Today, Ceta Form has established its position as a leading manufacturer of hand tools with 2 production plants, investments in foreign countries and global presence. Our products are now being used in the most prestigious factories, power plants, aircraft hangars and automotive workshops all over the World.

The year 2025, our 50th year anniversary, has seen us improve our logistics capabilities in particular thanks to the our new warehouse infrastructure which is in place. We are now in a position to make more rapid and higher ratio deliveries from stock. In 2026, our investments will focus on product diversification and capacity enlargement.

We would like to thank our devoted team, forward-looking visionary distributors, collaborative suppliers and loyal users for their strong partnerships.

CETA FORM DNA

Ceta Form products promise the users a high level of quality, functional designs, and a large range; this promise is embodied by 100% sales and after-sales support. Our fundamental motivation is to provide the users with comfort in their daily work and let them enjoy a sense of success and satisfaction.

3 PRODUCTION AND LOGISTICS LOCATIONS

Ceta Form operates in 3 different locations which are in Istanbul and conveniently located for our international visitors.

CERTIFIED QUALITY

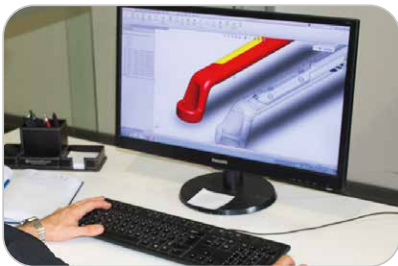

Ceta Form operates according to international management standards and internal product standards which often exceed DIN/ISO standards. Most of our insulated tools for working on live electricity are also VDE tested and certified.

MANUFACTURING COMPETENCE

With 51 years of experience in the development and production of hand tools and tool trolleys, Ceta Form stands for high quality standards and manufacturing excellence. In 2 different production locations, we run a variety of production technologies under one roof. Being an integrated manufacturer, we are able to keep a close eye on all critical processes.

The Ultimate Harmony of Ergonomics and Functionality

Offering the perfect balance of comfort and utility, this professional knife provides two distinct solutions in a single body: high-performance standard cutting and heavy-duty scraping.

Dual Mode: Seamlessly switch between cutting and scraping functions.

19 mm Trapezoidal Blade: Compatible with standard heavy-duty blades for versatile use.

Ergonomic Grip: Designed for extended use without hand fatigue.

LED Work Lights

Advanced Illumination for the Modern Workshop

Engineered to keep pace with the intense workflow of modern workshops and garages, our aluminum-bodied LED work lights feature advanced circuit board technology. These units maximize your productivity with high-intensity light output, while the magnetic base and lightweight design allow for hands-free operation in any environment.

30 Piece Combo Ball End Hexagon L Key Set (Long Arm) - Metric / SAE

Combining both Metric and SAE (Inch) measurement units in a single, compact case, this comprehensive set offers a professional solution for all your fastening needs. The manganese phosphate coating provides superior corrosion resistance while ensuring maximum durability during high-torque applications.

E69-ESSQ1

for End Sleeves - Square Form

Professional Square (Quadrilateral) Wire Ferrule Crimping Tool

Square (4-sided) jaw structure ensures the ferrule makes contact with the maximum surface area inside the terminal.

Ideal Usage: Recommended for spring-loaded terminals, rectangular entries, and all professional panel/installation connections requiring flat contact surfaces.

for End Sleeves-Hexagonal Form

Professional Hexagonal Wire Ferrule Crimping Tool

Hexagonal (6-sided) jaw structure applies 360-degree equal pressure to the ferrule.

Ideal Usage: Provides the best results for round terminal entries and standard connections in confined spaces.

Page 123

C-PLUS Voltage Testers - 250V

Professional Safety and Superior Durability

Engineered in full compliance with low-voltage standards, the new CPLUS voltage tester series ensures maximum safety for all electrical tasks. The VDE-approved models in the series have been strictly tested and certified by the German VDE institute. In addition to standard slotted tips, the range now includes a Phillips (PH1) tip version for enhanced versatility.

VDE Certified Safety

Approved electrical safety according to rigorous German VDE standards.

High-Strength Engineering

The 4.0 mm slotted model is specially designed for heavy-duty applications requiring increased torque and durability.

Phillips (PH1) Tip Option

An innovative solution combining voltage testing functionality with the practicality of a Phillips screwdriver.

Ergonomic Grip

The signature C-PLUS handle design ensures comfort and a secure grip during extended professional use.

Page 129

Professional 1000V VDE Interchangeable Slimline Series

Maximum Safety in Tight Spaces, Unrivaled Performance!

The new generation C-PLUS 1000V Interchangeable Screwdriver System combines occupational safety with ergonomic comfort for electrical professionals.

Slim Profile Design

Work seamlessly in confined spaces with extra-thin blade geometry.

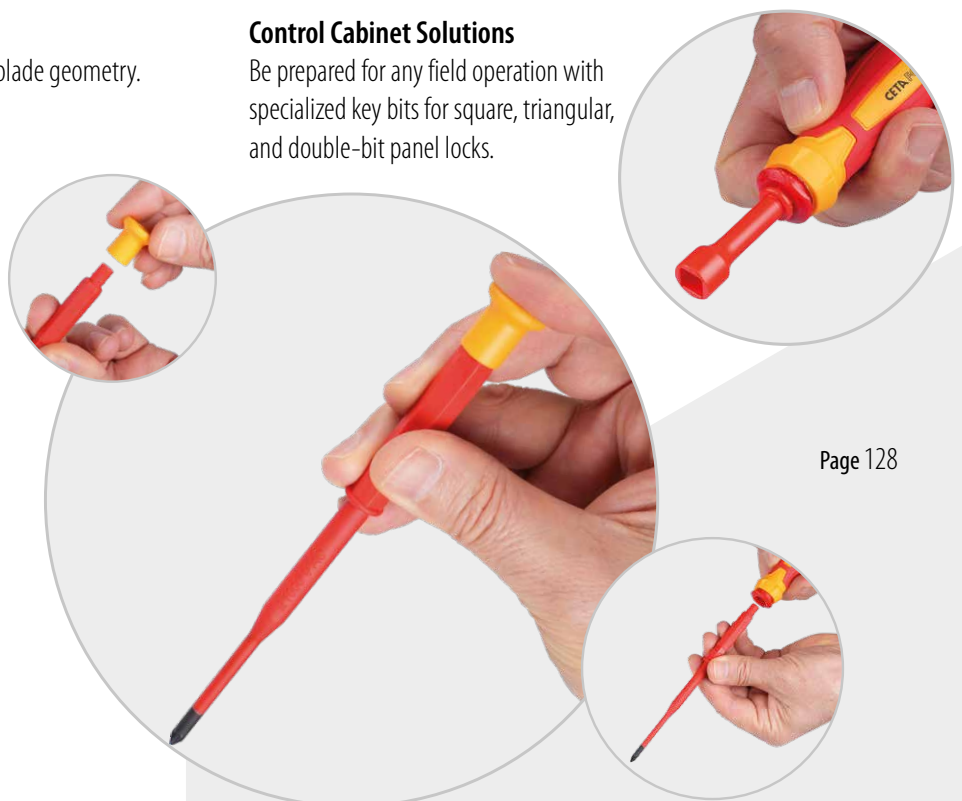

Versatile Modularity

Master every screw type (Slotted, Phillips, Pozidriv, Torx, and Terminal) with a single handle.

Control Cabinet Solutions

Be prepared for any field operation with specialized key bits for square, triangular, and double-bit panel locks.

This range incorporates blades with tiny diamond particles on the tip part. Hence, a very tight connection between the tip and the screw is guaranteed. Slipping off, which can cause problems when working on delicate materials, is therefore avoided.

Lu-MAX

Powerful and uniform illumination

Ceta Form has invested into a joint venture in Asia specialized in the production of LED work lamps in 2021. In this catalogue, we are pleased to show the range manufactured in this plant – truly better in design and performance. Thanks to the capabilities this new plant will provide, we aim to be an important player in the ever growing LED work lamp market.

100%
CETA FORM
Design

All work lights in this section excluding the flashlights are concept designed in the Ceta Form design labs. The electronic engineering is done by our expert team in the Weihai factory.

The Ceta Form Guarantee

Ceta Form offers a total quality guarantee for its tools against defects in material or workmanship. This guarantee covers the free repair or replacement of the faulty tool.

This guarantee is not valid for tools which have been misused or abused. A tool's normal wear and tear in the expected reasonable lifetime is also exempt from guarantee.

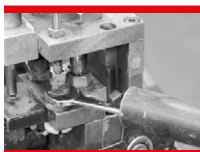

Exceptions of the Ceta Form Guarantee

Tool cabinets, tool cases, torque wrenches, tape measures, utility knives, lighting equipment, cutting tools and wire brushes are covered by a 2 year warranty against failures due to production defects.

Consumable items such as bits, hole saws, files, utility knife blades, hacksaw blades, jigsaw blades, plastic hammer heads and hand riveter spares are covered by a limited warranty only. This warranty is valid if the product is unusable when it is in new condition due to a possible production defect.

Examples of Improper Use

Compliance to the below mentioned instructions and avoiding misuse will ensure that your tools will serve you without any problems for years. This will also keep our warranties valid. In the event that our tools fail due to the one of the below shown types of misuses, the warranty will be invalid.

Never use extensions on tools unless it is specified that it is appropriate.

Ring ends of ratcheting combination wrenches should be used for rapid tightening. It is recommended that you use the open end for high torque final tightening.

Torque wrenches signal with a "click" sound when the preset torque is reached. Further application of power after this signal may destroy the ratchet or the spring mechanism.

Never use chromed sockets on impact wrenches. Use only impact sockets which are black coloured on impact wrenches.

Do not use your screwdriver as a lever or a chisel. Avoid exerting excess torque through using the hanging hole as a lever.

Always select the right type of screwdriver or screwdriver bit for the type of screw you are using. Too small or too big a screwdriver/bit compared to the screw may destroy the tool or the screw. Also be careful about the distinction between Phillips and Pozidrive screws.

Do not use pliers and cutters for cutting materials larger than the permissible capacities. Avoid short circuiting when working on live circuits as this may destroy the cutting edges.

Do not use cable shears to cut materials other than copper. Always conform to the cutting capacities when working on copper wires.

Do not use hammers on a material whose hardness is higher than the hammer head (50-58 Hrc).

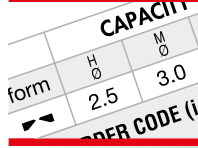

Tape measures should be used as a precision instrument. When being used in construction environment involving building chemicals etc., ensure that the tape is clear when rewinding. Keep away from water and moisture as this might rust the blade.

Do not use tools other than hammers for striking purpose.

Do not alter the sizes and dimensions of your tools.

Please conform to the capacities listed throughout the product tables.

The torque power of ballpoint hex tools is lower compared to normal hex tools. Please use them accordingly.
